PHOTOCHEMISTRY AND PHOTOBIOLOGY

An International Journal

Official Journal of the American Society for Photobiology

EDITOR

IRENE E. KOCHEVAR, PhD., Department of Dermatology,
Massachusetts General Hospital—Wel 224,
Harvard Medical School, Boston, MA 02114, USA
Tel. 617-724-3414, *Fax* 617-724-3425, *E-mail*: PHOTOCHEM@helix.mgh.harvard.edu

ASSOCIATE EDITORS

ROSALIE K. CROUCH,
Medical University of South Carolina,
Charleston, SC

CRAIG A. ELMETS,
Case Western Reserve University, Cleveland, OH

CHARLES J. GOMER,
University of Southern California, Los Angeles, CA

ANTHONY A. GORMAN,
University of Manchester, Manchester, England

DONAT-P. HÄDER,
Universität Erlangen-Nürnberg, Erlangen,
Germany

J. WOODLAND HASTINGS,
Harvard University, Cambridge, MA

DAVID L. MITCHELL,
University of Texas,
Smithville, TX

NANCY L. OLEINICK,
Case Western Reserve University,
Cleveland, OH

J. C. SCAIANO,
University of Ottawa, Ottawa, Ontario,
Canada

HUGO SCHEER,
Botanisches Institut der Universität,
München, Germany

WALTER S. STRUVE,
Iowa State University, Ames, IA

WILLIAM J. VAN DER WOUDE,
United States Department of Agriculture,
Beltsville, MD

PAUL VIGNY,
Centre de Biophysique Moléculaire,
C.N.R.S., Orléans, France

FOUNDING EDITORS

E. J. BOWEN, Oxford
S. CLAESSON, Uppsala
A. HOLLAENDER, Oak Ridge
D. SHUGAR, Warsaw
A. D. MCLAREN, Berkeley (Executive Editor, 1962–1966)

PHOTOCHEMISTRY AND PHOTOBIOLOGY

VOLUME 62 ISSUE 1 JULY 1995

INVITED REVIEW

Invertebrate visual pigments 1 Wolfgang Gärtner and Paul Towner

PHOTOCHEMISTRY, PHOTOPHYSICS AND PHOTOTECHNOLOGY

Somatostatin in a water-restricted environment: fluorescence and circular dichroism study in AOT reverse micelles 17 Kasturi Bhattacharyya and Soumen Basak

Liposome fusion and lipid exchange on ultraviolet irradiation of liposomes containing a photochromic phospholipid 24 C. G. Morgan, Y. P. Yianni, S. S. Sandhu and A. C. Mitchell

Interaction between human α_1-acid glycoprotein (orosomucoid) and 2-*p*-toluidinylnaphthalene-6-sulfonate 30 J. Albani, R. Vos, K. Willaert and Y. Engelborghs

Energy transfer-enhanced chemiluminescence of adamantanone (n,π^*) and ester (π,π^*) singlet and triplet excited states in the thermolysis of silyloxyaryl-substituted spiroadamantyl dioxetanes 35 Alexei V. Trofimov, Rostislav F. Vasil'ev, Karsten Mielke and Waldemar Adam

Contrasting structural impacts induced by *cis–syn* cyclobutane dimer and (6-4) adduct in DNA duplex decamers: implication in mutagenesis and repair activity 44 Jong-Ki Kim, Dinshaw Patel and Byong-Seok, Choi

The use of lipid headgroup charge to enhance photoinduced electron transfer in vesicles: reactions of functionalized pyrene with a two component viologen system 51 L. Li and L. K. Patterson

Photophysics of methylene blue–polynucleotide complexes in the picosecond time range: influence of the local structure of the polynucleotide 55 Mironel Enescu and Lars Lindqvist

Photoinduced transient phenomena on cyclodextrin solid complexes: photochemistry of aromatic ketones 60 Mónica Barra and J. C. Scaiano

The interaction of the excited states of safranine T with aliphatic amines in organic solvents 65 Maria V. Encinas, Carlos M. Previtali, Sonia G. Bertolotti and Miguel G. Neumann

Photosensitized reduction of L-biopterin in the active ternary complex of dihydrofolate reductase 71 John W. Ledbetter, Jr., Wolfgang Pfleiderer and James H. Freisheim

Decay kinetics of *N,N,N',N'*-tetramethylbenzidine photocations in frozen micellar solution of cetyltrimethylammonium bromide 82 Thomas Wolff, Susanne Weber, Britta Böhm and Andreas Schütz

ENVIRONMENTAL PHOTOBIOLOGY AND UVR EFFECTS

The generation of hydrogen peroxide by the UVA irradiation of human lens proteins 87 Mikhail Linetsky and B. J. Ortwerth

The development of personal dosimeters for use in the visible and ultraviolet wavelength regions 94 D. D. Duncan, W. Schneider, K. J. West, S. J. Kirkpatrick, S. K. West and the Salisbury Eye Evaluation Team

Increased UV exposure in Finland in 1993 101 Kari Jokela, Kirsti Leszczynski, Reijo Visuri and Lasse Ylianttila

Spectral dependence of UV-induced immediate and delayed apoptosis: the role of membrane and DNA damage — 108 — Dianne E. Godar and Anne D. Lucas

PHOTOMEDICINE

Subcellular localization of and photosensitization by protoporphyrin IX in human keratinocytes and fibroblasts cultivated with 5-aminolevulinic acid — 114 — Jean-Michel Gaullier, Marc Gèze, René Santus, Teresa Sa e Melo, Jean-Claude Mazière, Marc Bazin, Patrice Morlière and Louis Dubertret

Catalase inactivation following photosensitization with tetrasulfonated metallophthalocyanines — 123 — Tsvetan G. Gantchev and Johan E. van Lier

Elevation of GRP-78 and loss of HSP-70 following photodynamic treatment of V79 Cells: sensitization by nigericin — 135 — Liang-yan Xue, Munna L. Agarwal and Marie E. Varnes

Inactivation of cell surface receptors by pheophorbide *a*, a green pigment isolated from *Psychotria acuminata* — 144 — Jan A. Glinski, Eva David, Thomas C, Warren, Gordon Hansen, Scott F. Leonard, Phillip Pitner, Susan Pav, Rosita Arvigo, M. J. Balick, Eligio Panti and Peter M. Grob

In vivo spectrophotometric evaluation of neoplastic and non-neoplastic skin pigmented lesions. III. CCD camera–based reflectance imaging — 151 — R. Marchesini, S. Tomatis, C. Bartoli, A. Bono, C. Clemente, C. Cupeta, I. Del Prato, E. Pignoli, A. E. Sichirollo and N. Cascinelli

Molecular mechanism of drug photosensitization 7. Photocleavage of DNA sensitized by suprofen — 155 — G. Condorelli, L. L. Costanzo, G. De Guidi, S. Giuffrida and S. Sortino

Photofrin accumulation in malignant and host cell populations of a murine fibrosarcoma — 162 — Mladen Korbelik and Gorazd Krosl

Targeting activated lymphocytes with photodynamic therapy: susceptibility of mitogen-stimulated splenic lymphocytes to benzoporphyrin derivative (BPD) photosensitization — 169 — Modestus O. K. Obochi, Alice J. Canaan, Ashok K. Jain, Anna M. Richter and Julia G. Levy

Hydrogen peroxide mediates UV-induced impairment of antigen presentation in a murine epidermal-derived dendritic cell line — 176 — Gisela Caceres-Dittmar, Kiyoshi Ariizumi, Shan Xu, Felix J.Tapia, Paul R. Bergstresser and Akira Takashima

Sulfophthalocyanines for photodynamic inactivation of viruses in blood products: effect of structural modifications — 184 — Cynthia M. Allen, Joseph M. Weber and Johan E. van Lier

PHOTOSENSORY BIOLOGY

Additional evidence for blepharismin photoreceptor pigment mediating step-up photophobic response of unicellular organism, *Blepharisma* — 190 — Tatsuomi Matsuoka, Yoshiya Watanabe, Yasuhiro Sagara, Miyuki Takayanagi and Yoji Kato

A simple and improved method of isolation and purification for native oat phytochrome — 194 — Veniamin N. Lapko and Pill-Soon Song

Spectroscopic and photoacoustic studies of hypericin embedded in liposomes as a photoreceptor model — 199 — F. Lenci, N. Angelini, F. Ghetti, A. Sgarbossa, A. Losi, A. Vecli, C. Viappiani, P. Taroni, A. Pifferi and R. Cubeddu

RAPID COMMUNICATION

Magnetic field effects on the photohemolysis of human erythrocytes by ketoprofen and protoporphyrin IX — 205 — C. F. Chignell and R. H. Sik

PHOTOCHEMISTRY AND PHOTOBIOLOGY

VOLUME 62 ISSUE 2 AUGUST 1995

INVITED REVIEW

The role of urocanic acid in UV-induced immunosuppression: recent advances (1992–1994) 209 Mary Norval, Neil K. Gibbs and Jill Gilmour

p53 Gene mutations and photocarcinogenesis 218 Arun J. Nataraj, Jonathan C. Trent II and Honnavara N. Ananthaswamy

PHOTOCHEMISTRY, PHOTOPHYSICS AND PHOTOTECHNOLOGY

Formation of 7,8-dihydro-8-oxoguanine in the 1,2-dioxetane–induced oxidation of calf thymus DNA: evidence for photosensitized DNA damage by thermally generated triplet ketones in the dark 231 Waldemar Adam, Chantu R. Saha-Möller. André Schönberger, Maurice Berger and Jean Cadet

Spontaneous recovery of fluorescence by photobleached surface-adsorbed proteins 239 Andrea L. Stout and Daniel Axelrod

Photoionization of crystal violet in aqueous solution 245 A. C. Bhasikuttan, A. V. Sapre, K. V. S. Rama Rao and J. P. Mittal

Comparison of the solid-matrix luminescence properties of benzo(a)pyrene–DNA adducts on ∝-cyclodextrin/NaCl and trehalose/NaCl matrices 251 Yu Chu and Robert J. Hurtubise

Investigation of light-induced conformation changes in spiropyran-modified succinylated poly(L-lysine) 258 Thomas M. Cooper, Morley O. Stone, Lalgudi V. Natarajan and Robert L. Crane

ENVIRONMENTAL PHOTOBIOLOGY AND UVR EFFECTS

Identification of a large genomic region in UV-irradiated human cells which has fewer cyclobutane pyrimidine dimers than most genomic regions 263 G. J. Kantor and D. M. Deiss-Tolbert

PHOTOSYNTHESIS AND PHOTOCONVERSION

Heterogeneity of the quinone electron acceptor system in bacterial reaction centers 271 Laura Baciou and Pierre Sebban

Chlorophylls in polymers. I. State of chlorophyll *a* in unstretched polymer systems 279 M. A. M. J. van Zandvoort, D. Wróbel, P. Lettinga, G. van Ginkel and Y. K. Levine

Chlorophylls in polymers. II. Pheophytin *a* in polymers and the influence of stretching on the state of chlorophylls in anhydrous polymer films 290 D. Wróbel, M. A. M. J. van Zandvoort, P. Lettinga, G. van Ginkel and Y. K. Levine

The orientation of the transition dipole moments of chlorophyll *a* and pheophytin *a* in their molecular frame 299 M. A. M. J. van Zandvoort, D. Wróbel, P. Lettinga, G. van Ginkel and Y. K Levine

Cloning, expression and sequence analysis of cDNA for the luciferases from the Japanese fireflies, *Pyrocoelia miyako* and *Hotaria parvula* 309 Yoshihiro Ohmiya, Nobuyoshi Ohba, Hiroyuki Toh and Frederick I. Tsuji

Response of the wild-type and high light-tolerant mutant of *Anacystis nidulans* against the photooxidative damage: differential mechanism of high light tolerance 314 D. P. Singh and Kavita Verma

PHOTOMEDICINE

Effect of hematoporphyrin derivative on hematological parameters in rats — 320 — Farhath Khanum, K. R. Anilakumar and K. Santhanam

The effect of chronic low-dose UVB radiation on Langerhans cells, sunburn cells, urocanic acid isomers, contact hypersensitivity and serum immunoglobulins in mice — 326 — Ali A. El-Ghorr, Mary Norval, Michael B. Lappin and John C. Crosby

In vivo excitation of photosensitizers by infrared light — 333 — P. Lenz

Age-related changes on the human lens as monitored by detection of porphyrin excited states — 339 — Joan E. Roberts, Stephen J. Atherton, Elizabeth R. Gaillard and James Dillon

Structure–activity relationship of porphines for photoinactivation of bacteria — 342 — Y. Nitzan, R. Dror, H. Ladan, Z. Malik, S. Kimel and V. Gottfried

Quantitative assessment of cumulative damage from repetitive exposures to suberythemogenic doses of UVA in human skin — 348 — R. M. Lavker, D. A. Veres, C. J. Irwin and K. H. Kaidbey

Alterations in erythrocyte band 3 organization induced by the photosensitizer, hematoporphyrin derivative — 353 — S. Beaton, R. A. McPherson and L. Tilley

PHOTOSENSORY BIOLOGY

Low-temperature trapping of early photointermediates of ∝-isorhodopsin — 356 — T. L. Mah, J. W. Lewis, M. Sheves, M. Ottolenghi and D. S. Kliger

Photostationary state compositions of retinal and related compounds included in ß-lactoglobulin. Effects of protein host on isomer distribution of polyene substrates — 361 — Xiao-Yuan Li and Robert S. H. Liu

PHOTOCHEMISTRY AND PHOTOBIOLOGY

VOLUME 62 ISSUE 3 SEPTEMBER 1995

INVITED REVIEWS

Chorophyll *a/b*-binding proteins — 367 — Harald Paulsen

Advances in photochemical approaches for blood sterilization — 383 — Ehud Ben-Hur and Bernard Horowitz

The role of epidermal cytokines in the generation of cutaneous immune reactions and ultraviolet radiation-induced immune suppression — 389 — Stephen E. Ullrich

PHOTOCHEMISTRY, PHOTOPHYSICS AND PHOTOTECHNOLOGY

Photochemistry of type I acid-soluble calf skin collagen: dependence on excitation wavelength — 402 — Julian M. Menter, George D. Williamson, Kimberly Carlyle, Cyril L. Moore and Isaac Willis

A comparative study of the visible light photochemistry of gilvocarcins V and M — 409 — Antonio E. Alegría, Luis Zayas and Norberto Guevara

The use of exogenous fluorescent probes for temperature measurements in single living cells — 416 — C. F. Chapman, Y. Liu, G. J. Sonek and B. J. Tromberg

Quenching of methylcylcohexane fluorescence by methanol 426 Ignacy Gryczynski and Joseph R. Lakowicz

Chemiluminescence and EPR studies on the excitation site of ferric–heme–oxo complexes of natural and model heme systems 433 Yang Liu and Hans Nohl

Effect of iron (III) on chemiluminescence from the neutralization reaction of nitric acid and potassium hydroxide 439 Terufumi Fujiwara, Hiroyuki Sakai and Takahiro Kumamaru

ENVIRONMENTAL PHOTOBIOLOGY AND UVR EFFECTS

Regulation and inhibition of collagenase expression by long-wavelength ultraviolet radiation in cultured human skin fibroblasts 444 Marta Petersen, Tiffani Hamilton and Hai-Li Li

The action spectra for UV-induced suppression of MLR and MECLR show that immunosuppression is mediated by DNA damage 449 H. M. H. Hurks, C. Out-Luiting, B. J. Vermeer, F. H. J. Claas and A. M. Mommaas

Ascorbic acid glycation of lens proteins produces UVA sensitizers similar to those in human lens 454 B. J. Ortwerth, Mikhail Linetsky and Paul R. Olesen

Activation of NF-κB in human skin fibroblasts by the oxidative stress generated by UVA radiation 463 Glenn F. Vile, Adrian Tanew-Iliitschew and Rex M. Tyrrell

Photosensitization of supercoiled DNA damage by 5,6-dihydroxyindole-2-carboxylic acid, a precursor of eumelanin 469 C. Routaboul, C.-L. Serpentini, P. Msika, J.-P. Cesarini and N. Paillous

Trends and interannual variations in erythemal sunlight, 1978–1993 476 John E. Frederick and Carynelisa Erlick

UVB-induced suppression of the mixed epidermal cell lymphocyte reaction is critically dependent on irradiance 485 H. M. H. Hurks, C. Out-Luiting, B. J. Vermeer, F. H. J. Claas and A. M. Mommaas

PHOTOSYNTHESIS AND PHOTOCONVERSION

Bioluminescence of Brazilian fireflies (Coleoptera: Lampyridae): spectral distribution and pH effect on luciferase-elicited colors. Comparison with elaterid and phengodid luciferases 490 Vadim R. Viviani and Etelvino J. H. Bechara

Interconversion of bacteriochlorophyll *c* aggregates in solid films upon organic vapor treatment 496 Kaku Uehara, Taro Tachibana, Masahiro Tsunooka and Yukihiro Ozaki

Resonance raman evidence for 15-*cis* to all-*trans* photoisomerization of spirilloxanthin bound to a reduced form of the reaction center of *Rhodospirillum rubrum* S1 502 Michitaka Kuki, Mitsuru Narsue, Tomisaburo Kakuno and Yasushi Koyama

Near-infrared FT-raman study of aggregation of bacteriochlorophyll *c* in whole living *Chlorobium limicola* 509 Hidetoshi Sato, Kaku Uehara, Takasada Ishii and Yukihiro Ozaki

Influence of change in the photon protective energy dissipation on red light-induced detrapping of the thermoluminescence z-band 514 Christoph Hagen, Andrew A. Pascal, Peter Horton and Yorinao Inoue

Chemiluminescent diphenylacetaldehyde oxidation by mitochondria is promoted by cytochromes and leads to oxidative injury of the organelle 522 Iseli L. Nantes, Giuseppe Cilento, Etelvino J. H. Bechara and Aníbal E. Vercesi

PHOTOMEDICINE

Stimulatory and inhibitory effects of iron on photodynamic inactivation of leukemia cells 528 Fubao Lin and Albert W. Girotti

Photothrombosis using two different phthalocyanine administration routes: continuous i.v. infusion *versus* bolus i.v. injection 535 Miltiadis K. Tsilimbaris, Ioannis G. Pallikaris and Stella Lydataki

Octa-alkyl zinc phthalocyanines: potential photosensitizers for use in the photodynamic therapy of cancer 542 Michael J. Cook, Isabelle Chambrier, Steven J. Cracknell Denise A. Mayes and David A. Russell

Subcellular distribution of hypericine in human cancer cells 546 Pavol Miskovksy, Franck Sureau, Laurent Chinsky and Pierre-Yves Yurpin

Characteristics of the chemiluminescence from the blood plasma of a normal human population 550 A. J. Matich, R. N. Tilbury and T. W. Jordan

EPR persistence measurements of UV-induced melanin free radicals in whole skin 557 Bernard Collins, Theodore O. Poehler and Wayne A. Bryden

The effect of photodynamic treatment of yeast with the sensitizer chloroaluminum phthalocyanine on various cellular parameters 561 Michel Paardekooper, Angeline E. Van Gompel, John Van Steveninck and Peter J. A. Van den Broek

In vitro demonstration of a fundamental difference in the proliferation of murine and human bone marrow and lymphocytes following ultraviolet irradiation; relevance to bone marrow transplantation 568 J. G. Hudson, R. Pullens, V. Godwin, A. W. Preece and D. H. Pamphilon

Biodistribution and virus inactivation efficacy of a silicon phthalocyanine in red blood cell concentrates as a function of delivery vehicle 575 E. Ben-Hur, M. M. Zuk, S. Chin, D. Banerjee, M. E. Kenney and B. Horowitz

Photodynamically generated 3-β-hydroxy-5α-cholest-6-ene-5-hydroperoxide: toxic reactivity in membranes and susceptibility to enzymatic detoxification 580 Peter G. Geiger, Witold Korytowski and Albert W. Girotti

PHOTOSENSORY BIOLOGY

Reduced near-UV sensitivity in *Phycomyces* mutants affected in the biosynthesis of 6,7-dimethyl-8-ribityllumazine 588 Sascha Tillmanns, Horst Senger and Paul Galland

PHOTOCHEMISTRY AND PHOTOBIOLOGY

VOLUME 62 ISSUE 4 OCTOBER 1995

SYMPOSIUM-IN-PRINT
MOLECULAR MECHANISMS IN BIOLUMINESCENCE

Guest Editors: J. Woodland Hastings and David Tu

Bioluminescence: similar chemistries but many different evolutionary origins 599 J. Woodland Hastings

Comments on the mechanisms of chemi- and bioluminescence 601 Thérèse Wilson

Chemical aspects of bioluminescence 607 Humphrey I. X. Mager and Shiao-Chun Tu

Biochemistry of bacterial bioluminescence 615 Shiao-Chun Tu and Humphrey I. X. Mager

Regulatory circuitry controlling luminescence autoinduction in *Vibrio fischeri* 625 S. Ulitzur and P. V. Dunlap

Symbiotic luminous soil bacteria: unusual regulation for an unusual niche	633	Pamela K. Hosseini and Kenneth H. Nealson
Biotechnological applications of bacterial bioluminescence (*lux*) genes	641	Jaidip Chatterjee and Edward A. Meighen
Green fluorescent protein	651	Martin Chalfie
Molecular evolution of the Ca^{2+}–binding photoproteins of the Hydrozoa	657	Frederick I. Tsuji, Yoshihiro Ohmiya, Thomas F. Fagan, Hiroyuki Toh and Satoshi Inouye
The chemical mechanism and evolutionary development of beetle bioluminescence	662	Keith V. Wood

PHOTOCHEMISTRY, PHOTOPHYSICS AND PHOTOTECHNOLOGY

Fluorescence studies on the adsorption of octadecylrhodamine B onto a latex surface	674	Kenichi Nakashima, Yoshinori Fujimoto and Naofumi Kido
Hydroperoxynaphthalimide derivative–mediated oxidation of lysozyme	680	Takahiro Yamamoto, Yasushi Maeda, Seiichi Matsugo and Hiromi Kitano
The photophysics of *p*-aminobenzoic acid	686	Arthur M. Halpern and B. R. Ramachandran
Singlet oxygen generation from liposomes: a comparison of time-resolved 1270 nm emission with singlet-oxygen kinetics calculated from a one dimensional model of singlet-oxygen diffusion and quenching	692	Yingxian Fu and Jeffrey R. Kanofsky

ENVIRONMENTAL PHOTOBIOLOGY AND UVR EFFECTS

Changes in the patterns of biosynthesis and composition of amino acids in marine phytoplankter exposed to ultraviolet-B radiation: nitrogen limitation implicated	703	Joaquim I. Goes, Nobuhiko Handa, Satoru Taguchi and Takeo Hama
Analysis of laser-induced fluorescence line shape of intact leaves: application to UV stress detection	711	N. Subhash, Piero Mazzinghi, Giovanni Agati, Franco Fusi and Bartolomeo Lercari
Impact of UVB and O_3 on the oxygen free radical scavenging system in *Arabidopsis thaliana* genotypes differing in flavonoid biosynthesis	719	Mulpuri V. Rao and D. P. Ormrod
Differential response of photosynthetic pigments, rubisco activity and rubisco protein of *Arabidopsis thaliana* exposed to UVB and ozone	727	Mulpuri V. Rao, G. Paliyath and D. P. Ormrod
Spectral albedo measurements in the UV and visible region over different types of surfaces	736	Uwe Feister and Rolf Grewe

PHOTOSYNTHESIS AND PHOTOCONVERSION

Induction kinetics of delayed luminescence in photosynthetic organisms as measured by an LED-based phosphorimeter	745	Werner Schmidt and Herbert Schneckenburger
Temperature dependence of chlorophyll(ide) spectral shifts and photoactive protochlorophyllide regeneration after flash in etiolated barley leaves	751	Philippe Eullaffroy, Richard Salvetat, Fabrice Franck and Radovan Popovic

PHOTOMEDICINE

Interaction of photodynamically induced cell killing and dark cytotoxicity of rhodamine 123	757	Jaap VanDerWal, Johan W. M. Lagerberg, Tom M. A. R. Dubbelman and John VanSteveninck

Evaluation of new benzoporphyrin derivatives with enhanced PDT efficacy 764 Ravindra K. Pandey, William R. Potter, Isabelle Meunier, Adam B. Sumlin and Kevin M. Smith

Ultraviolet erythema sensitivity in anamnestic (I–IV) and phototested (1–4) caucasian skin phototypes: the need for a new classification system 769 E. Snellman, C. T. Jansén, K. Leszczynski, R. Visuri, T. Milan and K. Jokela

Carcinogenic and melanogenic effects of a filtered metal halide UVA source and a tubular fluorescent UVA tanning source with or without additional solar-simulated UV radiation in hairless mice 773 Niels Bech-Thomsen and Hans Christian Wulf

Photosensitization of murine tumor, vasculature and skin by 5-aminolevulinic acid–induced porphyrin 780 Barbara W. Henderson, Lurine Vaughan, David A. Bellnier, Henricus van Leengoed, Patricia G. Johnson and Allan R. Oseroff

Potentiation of merocyanine 540–mediated photodynamic therapy by salicylate and related drugs 790 Donald L. Traul, Gregory S. Anderson, James M. Bilitz, Marianne Krieg and Fritz Sieber

PHOTOSENSORY BIOLOGY

The effect of light quality on *Prunus cerasus* II. Changes in hormone levels in plants grown under different light conditions 800 Rita Baraldi, Gianpaolo Bertazza, Judit Bogino, Virginia Luna and Rubén Bottini

RAPID COMMUNICATION

On the possibility of calcium imaging using Indo-1 with three-photon excitation 804 Ignacy Gryczynski, Henryk Szmacinski and Joseph R. Lakowicz

PHOTOCHEMISTRY AND PHOTOBIOLOGY

VOLUME 62 ISSUE 5 NOVEMBER 1995

PHOTOCHEMISTRY, PHOTOPHYSICS AND PHOTOTECHNOLOGY

Modification of α-chymotrypsin using a water-soluble photo-Fenton reagent 809 Hiromi Kitano, Yasushi Maeda, Kanae Furukawa, Takahiro Yamamoto, Rie Izumida and Seiichi Matsugo

Photochemical reactions of azidocoumarins 813 Kesheng Feng, Farah Mahdavi-Anary, Richard E. Partch and Yuzhuo Li

Influence of combined AC–DC magnetic fields on free radicals in organized and biological systems. Development of a model and application of the radical pair mechanism to radicals in micelles 818 J. C. Scaiano, F. L. Cozens and N. Mohtat

Autofluorescence spectroscopy of optically trapped cells 830 Karsten König, Yagang Liu, Greg J. Sonek, Michael W. Berns and Bruce J. Tromberg

Nucleic acid hybridization accompanied with excimer formation from two pyrene-labeled probes 836 Katsuyoshi Ebata, Masayuki Masuko, Hiroyuki Ohtani and Masaki Kashiwasake-Jibu

ENVIRONMENTAL PHOTOBIOLOGY AND UVR EFFECTS

Ultraviolet action spectra for photobiological effects in cultured human lens epithelial cells — 840 — Usha P. Andley and Jennifer G. Weber

PHOTOSYNTHESIS AND PHOTOCONVERSION

Resonance-enhanced CARS spectroscopy of biliproteins. Influence of aggregation and linker proteins on chromophore structure in allophycocyanin (*Mastigocladus laminosus*) — 847 — S. Schneider, C.-J. Prenzel, G. Brehm, L. Gottschalk, K.-H. Zhao and H. Scheer

PHOTOMEDICINE

Protection against ultraviolet-B radiation–induced local and systemic suppression of contact hypersensitivity and edema responses in C3H/HeN mice by green tea polyphenols — 855 — Santosh K. Katiyar, Craig A. Elmets, Rajesh Agarwal and Hasan Mukhtar

Reduction of interferon-γ as a critical mechanism by which ultraviolet radiation prevents tumor rejection — 862 — Helen L. Gensler, Jeannette Simpson, Kevin Gerrish and James Gilmore

Inactivation of *Trypanosoma cruzi* trypomastigote forms in blood components by photodynamic treatment with phthalocyanines — 869 — Paul Gottlieb, Li-Gang Shen, Eleanor Chimezie, Soon Bahng, Malcolm E. Kenney, Bernard Horowitz and Ehud Ben-Hur

Sites of photodamage *in vivo* and *in vitro* by a cationic porphyrin — 875 — David Kessel, Kathryn Woodburn, Barbara W. Henderson and C. K. Chang

In situ comparison of 665 nm and 633 nm wavelength light penetration in the human prostate gland — 882 — L. K. Lee, C. Whitehurst, M. L. Pantelides and J. V. Moore

Cellular fluorescence of the endogenous photosensitizer protoporphyrin IX following exposure to 5-aminolevulinic acid — 887 — Pia Steinbach, Helmut Weingandt, Reinhold Baumgartner, Martin Kriegmair, Ferdinand Hofstädter and Ruth Knüchel

The validation of a new vascular damage assay for photodynamic therapy agents — 896 — David A. Bellnier, William R. Potter, Lurine A. Vaughan, Theresa M. Sitnik, John C. Parsons, William R. Greco, James Whitaker, Patricia Johnson and Barbara W. Henderson

Distribution of 5-aminolevulinic acid–induced porphyrins in noduloulcerative basal cell carcinoma — 906 — Qian Peng, Trond Warloe, Johan Moan, Helen Heyerdahl, Harald B. Steen, Jahn M. Nesland and Karl-Erik Giercksky

cis-Urocanic acid failed to affect *in vitro* human Langerhans cell allostimulatory function — 914 — Frédérique-Marie Rattis, Josette Péguet-Navarro, Pascal Courtellemont, Gérard Redziniak and Daniel Schmitt

Psoralen-mediated virus photoinactivation in platelet concentrates: enhanced specificity of virus kill in the absence of shorter UVA wavelengths — 917 — Henrietta Margolis-Nunno, Richard Robinson, Bernard Horowitz, Nicholas E. Geacintov and Ehud Ben-Hur

Chromophore-assisted laser inactivation of subunits of the T-cell receptor in living cells is spatially restricted — 923 — Joseph C. Liao, Leslie J. Berg and Daniel G. Jay

PHOTOSENSORY BIOLOGY

Functional mapping of the branched signal transduction pathway that controls sporulation in *Physarum polycephalum* — 930 — Christine Starostzik and Wolfgang Marwan

An apparatus for studying rapid electrophysiological responses to light demonstrated on *Arabidopsis* leaves — 934 — Edgar P. Spalding

Mulch surface color affects accumulation of epicuticular wax on developing leaves 940 M. J. Kasperbauer and R. E. Wilkinson

Spectroscopic studies on a retinylidene-imine-tetrafluoroborate 945 Jan Baran, Marek Ilczyszyn, Henryk Ratajczak, Marie-Hélène Baron, Annie Piart-Goypiron, Nicole Ratovelomanana, Hassan Zine and Camille Sandorfy

RAPID COMMUNICATION

Singlet oxygen is not produced in photosystem I under photoinhibitory conditions 949 Éva Hideg and Imre Vass

PHOTOCHEMISTRY AND PHOTOBIOLOGY

VOLUME 62 ISSUE 6 DECEMBER 1995

SYMPOSIUM-IN-PRINT
DEDICATED TO BRIAN JOHNSON 1936–1994
GUEST EDITOR: NEIL K. GIBBS

Introduction 953 Neil K. Gibbs

Fluoroquinolone photosensitization: a review of clinical and laboratory studies 954 James Ferguson

Photodegradation of nifedipine under *in vivo*-related circumstances 959 Henk de Vries and Gerard M. J. Beijersbergen van Henegouwen

Dietary fat modulates immunoresponsiveness in UV-irradiated mice 964 Homer S. Black, Goodluck Okotie-Eboh, Janette Gerguis, Julie I. Urban and John I. Thornby

Induction and disappearance of thymine dimers in human skin exposed to UVB radiation: flow cytometric measurements in replicating and nonreplicating epidermal cells 970 Rob J. W. Berg, Susan C. de Bueger, Kees Guikers, Huib van Weelden, Willem A. van Vloten, Jan C. van der Leun and Frank R. de Gruijl

The action spectrum for induction of chronic actinic dermatitis is similar to that for sunburn inflammation 976 H. du P. Menagé, G. I. Harrison, C. S. Potten, A. R. Young and J. L. M. Hawk

Bilirubin phototoxicity to human cells by green light phototherapy *in vitro* 980 F. Böhm, F. Drygalla, P. Charlesworth, K. Böhm, T. G. Truscott and K. Jokiel

INVITED REVIEW

Photobiological application of nonlinear visible/nir–spectroscopic techniques, exemplified by the primary processes of bacterial photosynthesis 984 Dieter Leupold

PHOTOCHEMISTRY, PHOTOPHYSICS AND PHOTOTECHNOLOGY

Photoreaction of 5-methoxypsoralen with thymidine and the thymine moiety of isolated and *Saccharomyces cerevisiae* DNA. Characterization and measurement of the two *cis-syn* furan-side monocycloadducts 997 Catherine Anselmino, Dietrich Averbeck and Jean Cadet

The photochemistry of human retinal lipofuscin as studied by EPR	1005	Krzysztof Reszka, Graig E. Eldred, Ren-Hong Wang, Colin Chignell and James Dillon
Photoinduced electron transfer in a carotenobuckminsterfullerene dyad	1009	Hiroshi Imahori, Sergio Cardoso, Dereck Tatman, Su Lin, Lori Noss, Gilbert R. Seely, Leonides Sereno, Juana Chessa de Silber, Thomas A. Moore, Ana L. Moore and Devens Gust

ENVIRONMENTAL PHOTOBIOLOGY AND UVR EFFECTS

Solar UVR exposures of three groups of outdoor workers on the Sunshine Coast, Queensland	1015	H. P. Gies, C. R. Roy, S. Toomey, R. MacLennan and M. Watson
Bacterial photoprotection through extracellular cadmium sulfide crystallites	1022	Justin D. Holmes, Peter R. Smith, Richard Evans-Gowing, David J. Richardson, David A. Russell and John R. Sodeau
Vertical distribution of phytoplankton in coastal waters and its detection by backscattering measurements	1027	H. Piazena and D.-P. Häder

PHOTOSYNTHESIS AND PHOTOCONVERSION

Theoretical study of circular dichroism of the light-harvesting antenna of photosynthetic purple bacteria: a consideration of exciton interactions and energy disorder	1035	Vladimir I. Novoderezhkin and Andrei P. Razjivin

PHOTOMEDICINE

Visible light anaerobic photoconversion of tyrosine sensitized by riboflavin. Cytotoxicity on mouse tumoral cells.	1041	Eduardo Silva, Sonia Fürst, Ana M. Edwards, M. Ines Becker and Alfredo E. De Ioannes
The molecular chaperone function of α-crystallin is impaired by UV photolysis	1046	Raymond F. Borkman and Jennifer McLaughlin
Subcellular damage kinetics within co-cultivated WI38 and VA13-transformed WI38 human fibroblasts following 5-aminolevulinic-acid–induced protoporphyrin IX formation	1052	K. P. Überriegler, E. Banieghbal and B. Krammer
Photodynamic activities and skin photosensitivity of the *bis*(dimethylthexylsiloxy)silicon 2,3-naphthalocyanine in mice	1058	Nicole Brasseur, René Ouellet, Karina Lewis, William R. Potter and Johan E. van Lier
Minimum doses of ultraviolet radiation required to induce murine skin edema and immunosuppression are different and depend on the ultraviolet emission spectrum of the source	1066	Douglas B. Learn, Donathan G. Beasley, Lori D. Giddens, John Beard, Joseph W. Stanfield and Lee K. Roberts

PHOTOSENSORY BIOLOGY

Excited state behavior of phytochrome P_r	1076	Klaus Teuchner, Michael Schulz, Holger Stiel, Manfred Maisch and Wolfhart Rüdiger
Photomorphogenic responses to UV radiation III: a comparative study of UVB effects on anthocyanin and flavonoid accumulation in wild-type and *aurea* mutant of tomato (*Lycopersicon esculentum* Mill.)	1081	Kirsten Brandt, Alessandro Giannini and Bartolomeo Lercari
